# KAWAMOIO

CRANIOMAXILLOFACIAL

SYMPOSIUM

28<sup>th</sup> -31<sup>th</sup> **2019**  
October, Cairo Egypt  
**Hilton** Heliopolis

In participation With :

## Symposium Description:

Four days symposium that discuss state-of-the-art craniofacial, orthognathic and facial trauma surgery to have a step forward broadening your knowledge and mastering the techniques in the up to date management of different craniomaxillofacial deformities. It is composed of interactive lectures, case presentations and panel discussions about congenital and acquired craniofacial deformities as well as orthognathic surgery and facial trauma.

**Dr. Henry Kawamoto**  
Symposium chairman

**Dr. Paul Manson, MD**  
Symposium Co-Chairman

**Dr. Karam Allam**  
Symposium Director

### Course Faculty

**Dr. Henry Kawamoto, MD, DDS** (Symposium chairman )  
Professor of Plastic Surgery  
University of California Los Angeles, USA

**Dr. Paul Manson, MD** (Symposium Co-Chairman )  
Professor of Plastic Surgery  
Johns Hopkins University, USA

**Dr. Karam Allam, MD** (Symposium Director)  
Associate Professor of Plastic Surgery  
Sohag University, Egypt

### International Faculty

**Dr. John Grant, MD**  
Professor of Plastic Surgery  
University of Alabama at Birmingham, USA

**Dr. James M. Johnston, MD**  
Professor of Neurosurgery  
University of Alabama at Birmingham, USA

### National Faculty

**Dr. Amir Elbarbary, MD**  
Professor of Plastic Surgery  
Ain Shams University, Egypt

**Dr. Ahmed Elsherbiny, MD**  
Associate Professor of Plastic Surgery  
Sohag University, Egypt

**Dr. Fady Fahim, BDS, PhD**  
Assistant Professor of Orthodontics  
Cairo University, Egypt

**Dr. Sherif Bakri, MD**  
Assistant Professor of Plastic Surgery  
Sohag University, Egypt

**Dr. Mostafa Taha, BDS**  
Assistant Professor of Maxillofacial Surgery  
Ain Shams University, Egypt

## Target Participants

## MAIN Symposium TOPICS:

- History of craniofacial surgery: a personal perspective
- Craniofacial embryology
- Tessier's rare clefts: classification and clinical results
- Craniofrontonasal dysplasia: A surgical treatment Algorithm
- Management of trans-sphenoidal encephalocele
- Management of hypertelorbitism: timing, technique and changes
- Encephalocele: surgical tips
- Craniofacial microsomia & Treacher Collins syndrome: Steps in correction
- Technical considerations of craniofacial distraction osteogenesis
- Nasal dermoids with intracranial extension: step by step surgical technique
- Surgical Approaches to non-syndromic craniosynostosis
- Craniosynostosis: surgical techniques
- Surgical Correction of Crouzon, Apert and Pfeiffer malformations
- Atypical presentation of craniosynostosis and their surgical management
- Endoscopic management of craniosynostosis
- Spring-assisted cranioplasty
- Infections in craniosynostosis surgery
- Post-shunt craniosynostosis: presentation and surgical management
- Neurosurgical principles in complex craniofacial surgery
- Overview facial reconstruction
- Surgical considerations for craniofacial fibrous dysplasia
- Periorbital reconstruction
- Orbital decompression in Graves' disease
- Nasal reconstruction
- Forehead and scalp reconstruction
- Principles of composite defect and free tissue transfer reconstructions

**Monday, 28th of October 2019**

**Session I: Craniofacial Surgery**

**08:00 – 09:00 Registration and opening**

**09:00 – 10:00 History of craniofacial surgery: a personal perspective**

Dr. Henry Kawamoto, UCLA, USA

**10:00 – 10:20 Craniofacial embryology**

Dr. Karam Allam, Sohag University, Egypt

**10:20 – 11:20 Tessier's rare clefts: classification and clinical results**

Dr. Henry Kawamoto, UCLA, USA

**11:20 – 11:30 Open microphone session**

**11:30 – 12:00 Coffee break**

**12:00 – 12:40 Craniofrontonasal dysplasia: A surgical treatment Algorithm**

Dr. Henry Kawamoto, UCLA, USA

**12:40 – 12:50 Management of trans-sphenoidal encephalocele**

Dr. Amir Elbarbary, Ain Shams University, Egypt

**12:50 – 13:30 Management of hypertelorbitism: timing, technique and changes**

Dr. Henry Kawamoto, UCLA, USA

**13:30 – 13:45 Encephalocele: surgical tips**

Dr. John Grant, UAB, USA

**13:45 – 14:45 Craniofacial microsomia & Treacher Collins syndrome: Steps in correction**

Dr. Henry Kawamoto, UCLA, USA

**14:45 – 15:00 Open microphone session**

**15:00 – 16:00 Lunch**

**16:00 – 16:30 Technical considerations of craniofacial distraction osteogenesis**

Dr. Henry Kawamoto, UCLA, USA

**16:30 – 16:40 Nasal dermoids with intracranial extension: step by step surgical technique**

Dr. Ahmed Elsherbiny, Sohag University, Egypt

**16:40 – 17:30 Case presentation and discussion**

**17:30 – 18:00 Interactive group discussion (all faculty and participants)**

- Treatment of craniofacial microsomia in a growing child
- External versus internal distraction osteogenesis
- Long term effects and stability of distraction osteogenesis

**Tuesday, 29th of October 2019**

**Session II: Neuro-Cranium**

**08:30 – 09:30 Surgical Approaches to non-syndromic craniosynostosis**

Dr. Henry Kawamoto, UCLA, USA

**09:30 – 09:50 Craniosynostosis: surgical techniques**

Dr. John Grant, UAB, USA

**09:50 – 10:50 Surgical Correction of Crouzon, Apert and Pfeiffer malformations**

Dr. Henry Kawamoto, UCLA, USA

**10:50 – 11:00 Atypical presentation of craniosynostosis and their surgical management**

Dr. Ahmed Elsherbiny, Sohag University, Egypt

**11:00 – 11:20 Endoscopic management of craniosynostosis**

Dr. James Johnston, UAB, USA

**11:20 – 11:30 Spring-assisted cranioplasty**

Dr. Sherif Bakri, Sohag University, Egypt

**11:30 – 11:40 Infections in craniosynostosis surgery**

Dr. John Grant, UAB, USA

**11:40 – 11:50 Post-shunt craniosynostosis: presentation and surgical management**

Dr. Ahmed Elsherbiny, Sohag University, Egypt

**11:50 – 12:10 Neurosurgical principles in complex craniofacial surgery**

Dr. James Johnston, UAB, USA

**12:10 – 12:20 Open microphone session**

**12:20 – 12:40 Coffee break**

**12:40 – 13:30 Case presentation and discussion**

**13:30 – 14:00 Interactive group discussion (all faculty and participants)**

- Craniosynostosis: when to operate?
- Traditional cranioplasty vs alternative techniques: safety and efficacy
- Alternatives for intracranial pressure monitoring

**14:00 – 15:00 Lunch break**

## Session III: Facial Reconstruction

**15:00 – 15:40 Overview facial reconstruction**

Dr. Paul Manson, Johns Hopkins University, USA

**15:40 – 16:00 Surgical considerations for craniofacial fibrous dysplasia**

Dr. Henry Kawamoto, UCLA, USA

**16:00 – 16:20 Periorbital reconstruction**

Dr. Paul Manson, Johns Hopkins University, USA

**16:20 – 16:40 Orbital decompression in Graves' disease**

Dr. Henry Kawamoto, UCLA, USA

**16:40 – 17:00 Nasal reconstruction**

Dr. Paul Manson, Johns Hopkins University, USA

**17:00 – 17:10 Open microphone session**

**17:10 – 17:30 Coffee break**

**17:30 – 17:50 Cheek reconstruction**

Dr. Paul Manson, Johns Hopkins University, USA

**17:50 – 18:10 Forehead & scalp reconstruction**

Dr. Paul Manson, Johns Hopkins University, USA

**18:10 – 18:30 Principles of composite defect and free tissue transfer reconstructions**

Dr. Paul Manson, Johns Hopkins University, USA

**18:30 – 18:40 Open microphone session**

**Wednesday, 30 th of October 2019**

**Session IV: Facial Trauma**

**08:30 – 09:10 General overview and history of facial fracture management**

Dr. Paul Manson, Johns Hopkins University, USA

**09:10 – 09:30 Cranioplasty and intracranial devices**

Dr. Paul Manson, Johns Hopkins University, USA

**09:30 – 10:30 Periorbital trauma: management of late sequela**

Dr. Henry Kawamoto, UCLA, USA

**10:30 – 11:00 Frontal bone and frontal sinus /frontobasilar fractures**

Dr. Paul Manson, Johns Hopkins University, USA

**11:00 – 11:20 Periorbital reconstructions from trauma**

Dr. Paul Manson, Johns Hopkins University, USA

**11:20 – 11:30 Open microphone session**

**11:30 – 12:00 Coffee break**

**12:00 – 12:40 Ophthalmos: mechanisms and correction**

Dr. Paul Manson, Johns Hopkins University, USA

**12:40 – 13:00 Optic nerve/vision issues, superior orbital fissure syndrome**

Dr. Paul Manson, Johns Hopkins University, USA

**13:00 – 13:10 Managing midfacial trauma using hidden surgical approaches**

Dr. Amir Elbarbary, Ain Shams University, Egypt

**13:10 – 13:30 Nasoethmoid fractures: early and late considerations**

Dr. Paul Manson, Johns Hopkins University, USA

**13:30 – 13:50 Nasal Fractures**

Dr. Paul Manson, Johns Hopkins University, USA

**13:50 – 14:00 Tailoring ZMC fracture management**

Dr. Amir Elbarbary, Ain Shams University, Egypt

**14:00 – 14:20 Mandible fractures**

Dr. Paul Manson, Johns Hopkins University, USA

**14:20 – 14:40 Pediatric facial fractures**

Dr. Paul Manson, Johns Hopkins University, USA

**Wednesday, 30 th of October 2019**

**Session IV: Facial Trauma**

14:40 – 15:00 **Open microphone session**

15:00 – 16:00 **Lunch break**

16:00 – 16:20 **Management of traumatic soft tissue defects/lacerations**

Dr. Paul Manson, Johns Hopkins University, USA

16:20 – 16:40 **Complex craniofacial trauma**

Dr. John Grant, UAB, USA

16:40 – 17:20 **Gunshot and Shotgun wounds/ballistical injuries**

Dr. Paul Manson, Johns Hopkins University, USA

17:20 – 17:30 **Open microphone session**

17:30 – 17:50 **Coffee break**

17:50 – 18:20 **Case presentation**

18:20 – 19:30 **Interactive group discussion (all faculty and participants)**

- Condylar Fractures (closed or open treatment and if open, how?)
- Fractures of the Internal Orbit: enophthalmos &/or double vision, as separate indications for surgical vs non-surgical management
- Frontal Sinus Fractures: the changing treatment paradigms
- Cranial Reconstructions:
  - Options and preferences
  - Alloplastic vs autogenous
- Fracture of edentulous mandible and maxilla:
  - Treatment differences,
  - The need/use of primary bone grafting, soft tissue procedures

**Thursday, 31st of October 2019**

**Session V: Orthognathic Surgery**

**08:30 – 09:10 Step by step genioplasty**

Dr. Henry Kawamoto, UCLA, USA

**09:10 – 09:50 Anterior segmental osteotomies**

Dr. Henry Kawamoto, UCLA, USA

**09:50 – 10:10 Temporomandibular joint considerations in orthognathic surgery**

Dr. Mostafa Taha, Ain Shams University, Egypt

**10:10 – 10:50 Technical considerations of sagittal split osteotomy of the mandible**

Dr. Henry Kawamoto, UCLA, USA

**10:50 – 11:00 Open microphone session**

**11:00 – 11:20 Coffee break**

**11:20 – 12:00 Simplifying the LeFort I osteotomy**

Dr. Henry Kawamoto, UCLA, USA

**12:00 – 12:40 Indications and refining the LeFort II osteotomy**

Dr. Henry Kawamoto, UCLA, USA

**12:40 – 13:00 Surgically assisted orthodontic treatment**

Dr. Fady Fahim, Cairo University, Egypt

**13:00 – 13:40 Facial asymmetry: common overlooked etiology**

Dr. Henry Kawamoto, UCLA, USA

**13:40 – 14:00 Open microphone session**

**14:00 – 15:00 Lunch break**

**15:00 – 16:00 Case presentation and discussion**

**16:00 – 16:40 Interactive group discussion (all faculty and participants)**

- Orthognathic surgery: surgery-first versus orthodontics-first approach
- Orthognathic surgery in cleft patients
- Surgeon vs orthodontist satisfaction after orthognathic surgery
- Which jaw to go first in double jaw surgery

**16:40 – 17:00 Coffee break**

**17:00 – 18:00 Lessons from the masters (closing lecture)**

Dr. Henry Kawamoto, UCLA, USA

**18:00 – 18:30 Closing and certificates**

**FOR REGISTRATION,  
accommodation and flight assistance :**

☎ 010 26 624 000 / 010 90 200 802
